M2 PRESSWIRE-10 June 1998-LANODE: compact analyser simplifies
networking testing (C)1994-98 M2 COMMUNICATIONS LTD RDATE:080698 Lanode
Ltd

is introducing a mobile WAN protocol analyser, the HCT-6000, that takes the
full functionality of large bench testers and places it in a compact,
notebook sized unit. The strength of this product is that its rich feature
set is contained in a highly portable machine. Mobility has been at the
heart of the design with features such as internal rechargeable batteries,
LCD (backlight for low ambient light conditions) and a light weight. The
HCT-6000 therefore makes an excellent choice for on-site equipment
installations, Bit Error Rate Tests (up to 2M), and on/off line
diagnostics. However, portability has not been at the expense of a reduced
instruction set. The analyser supports ASYNC, SYNC(BSC), HDLC, SDLC, X.25
(levels 2 and 3) and DDCCMP (optional Firmware ROM for Frame Relay, TCP/IP,
SLIP and PPP) protocol communications. The HCT-6000 features an interface
selector for RS-449, RS-232 and V.35 (G.703 is achieved using a

supplementary adapter). LED's indicate; external power attachment, battery condition, interface selected, DTE or DCE emulation, power to the external interface, and Red/Green LED pairs to indicate the status of all signal lines. A user friendly interface to the unit is implemented by an LCD graphics array, full ASCII keyboard, and an easy to use menu driven operating system. Having configured the HCT-6000 manually or by its automatic configuration mode, the user can program the unit to monitor or emulate network equipment, in either DTE or DCE mode. This powerful feature utilises an easy to use menu driven editor that removes the need to learn a programming language. When run, these programs allow for real-time analysis of data and communication signals across the link, so facilitating debugging and interface development at the work bench. Alternatively, programs and captured data during tests may be stored for later analysis using the built-in file manager capable of supporting up to five program or data files. The HCT-6000 belongs to a range of WAN analysers and BERT's manufactured by CTC Union Technologies of Taiwan, the UK marketing of which is by Lanode. Prices for these testers start at GBP 1,450 for the 128k BERT, rising to GBP 3,795 for the protocol analyser/2M BERT. Lanode strongly believes that its reputation for providing quality solutions can only be enhanced within the networking community by the introduction of these products in the UK. Mr Donal McDonnell, Lanode's Sales Manager says, "Any Communications Manager considering purchasing an analysis tool must take a serious look at this product. This unit enables the engineer to take the power of bench analysers out into the field. It not only offers all the features expected on a product of this type, but the flexibility given to the user, and its cost make it a strong alternative to all other products available today."
